# IT INVESTMENT OUTLOOK FOR MEDELLIN

The city advances while implementing its strategy: “Medellin the Software Valley” and seeks to become the focal point of the industry in Latin America. This strategy is also in search of driving an integral development through a change in its territory’s economic vocation, where technology has a leading role. Such transformation generates and strengthens new talents and attracts other technological companies in the city -amongst many other initiatives-.

Currently the software and IT services sector represents 6% of the total amount of foreign investment that has come to the city and, although the weight of investment is relatively low, its greatest impact is reflected in the number of investment projects and the jobs they can generate. For Medellín, foreign investments in this area represent the creation of more than 10,800 jobs from 98 investment projects of 89 companies.

## FOREIGN INVESTMENT LOG IN THE SOFTWARE AREA AND IT SERVICES IN MEDELLIN - MILLIONS OF USD

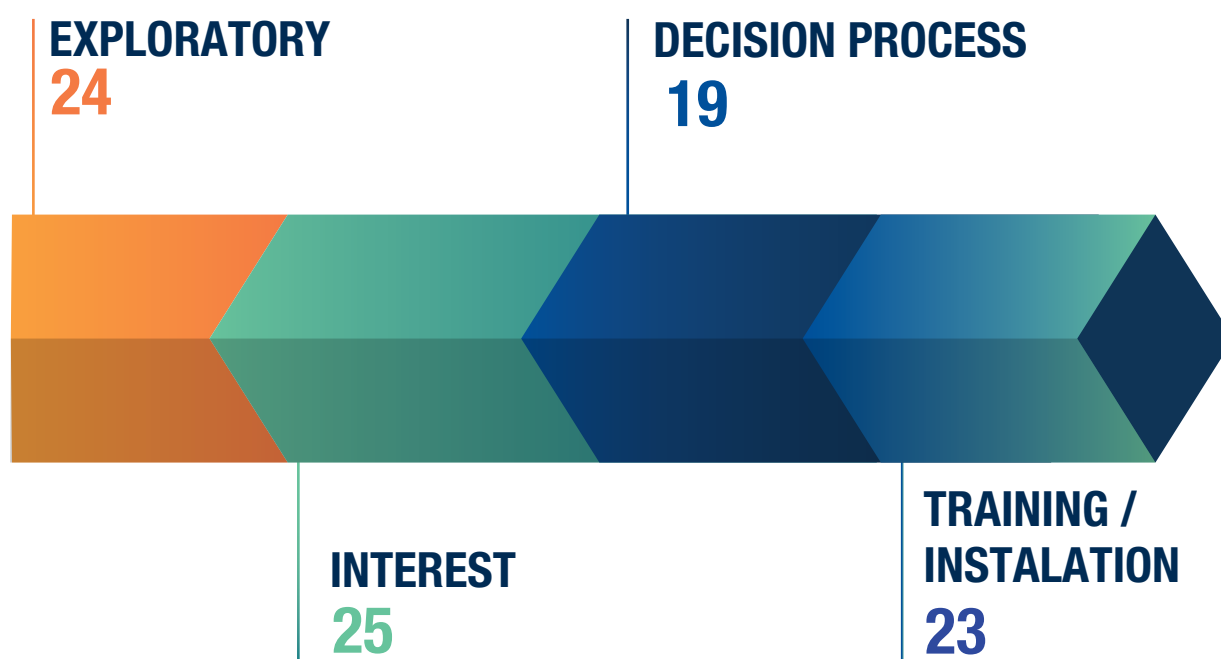

Source: ACI Medellín, 2022.

Future investment prospects in the city are very positive. Considering that foreign investments take an average of 2.5 years to be carried out, the pipeline of investment projects in the software and IT services sector, currently has 91 projects, 25% of which are in the process of being installed in the city (23 projects).

As for project numbers, they correspond to a total of 93.7 million USD, from which it is expected that 10.3 million USD can be certified in a short term as a city investment.

Investments in the software and IT service sector, find in the city a favourable ecosystem to develop their businesses and a firm commitment to innovation and technology. Today Medellin is the only Colombian city recognized as a special district of Science, Technology, and Innovation. The “STI district” which brings benefits in tax, fiscal and administrative matters and allows to consolidate the construction of the Software Valley, the intelligent territory, the attraction of companies and foreign investment to the city. Medellin is also the headquarters of the first centre for the fourth industrial revolution: C4RI – in Latin America, the creation of Ruta N Innovation and Business centre that leads the economic transformation of the territory towards knowledge-based businesses; likewise, the city has the most ambitious public policy for Science, Technology and Innovation in Colombia which has allowed the city’s investment in STI activities to reach 2.45% of its GDP.

# WHAT TYPE OF TECHNOLOGY COMPANIES ARE LANDING IN MEDELLIN?

The type of activities and operations that software and IT services mostly develop in the city are software development, associate provision services (86%), followed by data processing (7%) and to a lesser extent, activities associated to Fintechs & Edtechs with a 4% & 3% of investment projects respectively.

# SOME SUCCESSFUL CASES

**mercado  
libre**

Mercado Libre, a company leader in e-commerce in the continent, created more than 500 new Jobs in Medellin with the opening of a second Product, Innovation and Technology Centre. The city will serve the Latin American market with local talent trained in the skills of the Fourth Industrial Revolution. This is the second largest city in the country to have a centre of this type. In addition to Colombia this centre is present in Argentina, Brazil, Chile, Uruguay, and Mexico.

**LEAN SOLUTIONS  
GROUP**

With a total of 5 thousand employees in all the country and approximately 1000 in Medellin Lean Solutions Group is positioning itself as one of the fastest growing foreign companies in the capital of Antioquia. This Colombian American multinational was born in 2012, whose objective was to accompany logistics and transport companies from the USA in its staff selection processes. Now it has 5 lines of work: LeanStaffing offers logistics and BackOffice services; LeanTech development of software projects; LeanSales offers trained personnel in B2B strategies and sales; LeanMarketing offers design, digital marketing, photo, and video as well as strategies to gain more audience in social media; and LeanBPO offering BPO services and customer service.

**Rockwell  
Automation**

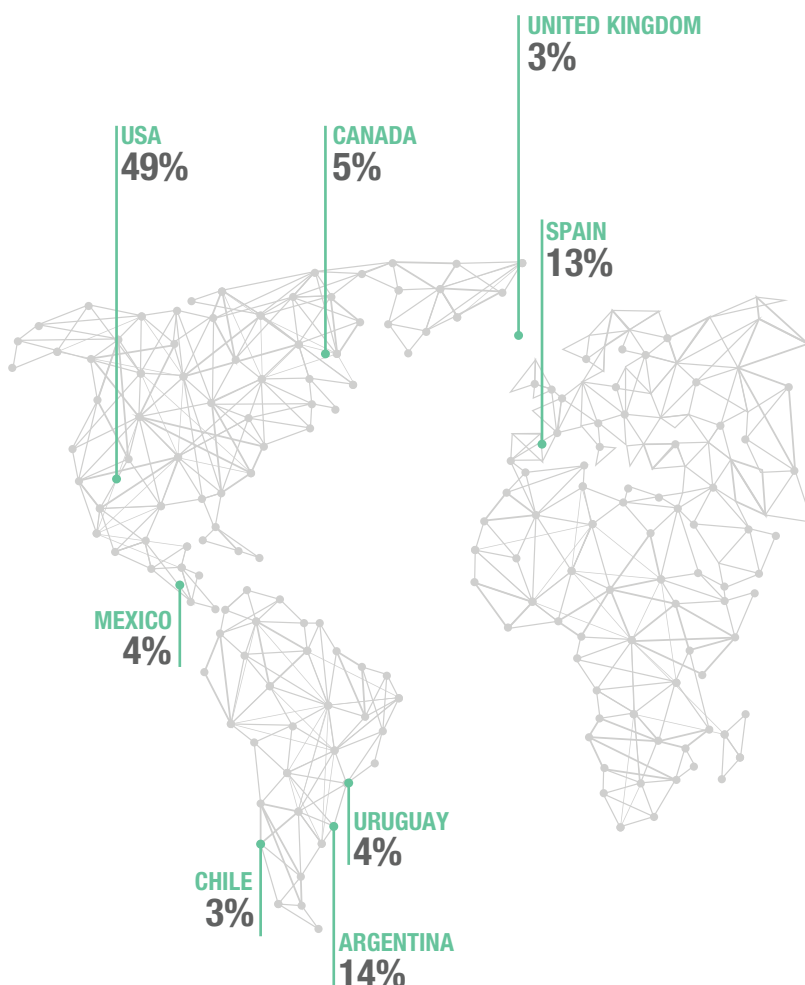

Rockwell Automation, whose headquarters are located in Wisconsin, USA employs around 23.000 people in more than 100 countries becoming a world leader in solutions for industrial automatization.

The company opened operations in Medellin and will focus its strategies on software development to support its global list of clients, several of them Fortune 500. The Rockwell Automation campus in Medellin plans to hire a team of software engineers, programmers, and professionals of advanced automatization.

# IS MEDELLIN AN ATTRACTIVE DESTINY FOR NEARSHORING?

Yes indeed. Reviewing the data of the country of origin of the investment in the software and IT services sector, we find that 49% of the projects come from the USA and to a lesser extent Spain, Canada, Mexico, Uruguay, and United Kingdom.

These investment projects are installed in Medellin mainly for development outsourcing, software development and services to offer support to the companies' current clients as well as creating strategic alliances with local companies or establish their own operations (Greenfield investments) for the development of new solutions and to attend the Latin American market from Medellin.

## TOP 10

COUNTRIES OF ORIGIN OF  
INVESTMENT – NUMBER OF  
PROJECTS

Source: ACI Medellin, 2022.

This makes us an ideal market for nearshoring investments given the advantages that Medellin offers today: first, access to an abundant and qualified labour force; second, the efficiency in operating costs; third, Medellin is seen as a platform for exporting services to the North American and Latin American market; and finally, the levels of bilingualism in the region are very high. According to data from Saber Pro-2020 tests, Antioquia university students in the last semester of all university degrees ranked second nationally in the English test where one (1) out of every three (3) evaluated obtained a B1 or B+ level. Specifically for systems engineering students, 49% of those evaluated have a B1 level or higher.

## ENGLISH LEVEL OF LAST SEMESTER STUDENTS IN SYSTEMS ENGINEERING 2020

Source: Saber Pro - 2020

Additionally, Medellin has an ideal geographical location for imports and exports operations of goods and services. Thanks to the free trade agreement networks that Colombia has today, we have access to tariff preferences in 60 countries, which, in total, represent a market of more than 1.500 million consumers. Likewise, the country is seen as a platform for exports in America by having trade agreements with 97% of the countries in the American continent.

COLOMBIA IS AN  
IDEAL MARKET FOR  
NEARSHORE

Medellin, tech software valley in Latin America

# STRATEGIC TIME ZONE

Colombia has the same time zone as the east coast of the USA and only three hours difference from the west coast, making it easy to offer services to one of the most important markets of the world.

## PROFITABLE SOLUTIONS

LATAM is a very convenient place to hire IT talent since the cost of resources is much lower than all the skills together in the USA. This without compromising the quality of delivery.

## SUPERIOR TALENT

Colombia has strengthened its capabilities and education system around technology with the “Colombia Bring IT On” campaign launched in 2014, which seeks to boost the Colombian IT industry and position itself as a player in the global IT market.

With more than 30 world-class universities and close to 20,000 software development graduates per year, Colombian software developers are having a major impact on the global software development community.

# COLOMBIA, A COUNTRY WITH ECONOMIC GROWTH

Currently, the country ranks 67th in terms of ease of doing business according to the World Bank Group's annual doing business report, ahead of Costa Rica (74th), Uruguay (101st), and Argentina (126th) among others.

Colombia's development in this area has been possible to a large extent by implementing some new laws and regulations which simplify and improve various processes such as starting a business, transferring properties, controlling contract enforcement, trade through borders and tax payments. In addition, the country also made paying this less costly by reducing the payroll tax rate and introduced exemptions for employer-paid health care contributions.

Recently, Medellin received the Nearshore Americas award "Nearshore Destiny year 2019" in recognition of its growth in the software development outsourcing space and its overall impact on the Nearshore industry.

## HISTORICAL GROWTH COLOMBIAN ECONOMY

Gross Domestic Product (GDP) is expected to grow 6.1% in 2022, well above countries in the continent such as Argentina with an expected growth of 3.6% by 2022; Brazil with 0.6% in 2022; or Chile 1.4% in 2022. *The Organization for Economic Cooperation and Development (OECD).*

## REAL GDP IN LATAM SINCE 2012

Source: Instituto de Finanzas Internacionales

Thus, the country positions itself as a leader in the region, surpassing Peru's (34%), Chile's (27%), Mexico's (13%), Argentina's (3%) and Brazil's (0%) growth in the last decade.

Just last year, Colombia's GDP grew 10,6% yearly and, in fact, according to the International Monetary Fund (FMI), this year it would reach 5,8%, exceeding projections of countries like Spain (4,8%), China (4,4%) and Canada (3,9%).

## DEVALUATION, IS IT AN ADVANTAGE FOR NEARSHORING INVESTMENTS?

The entry of foreign capital into the country for nearshore modalities has benefited from the rebound of the dollar against the peso in the last years, since it represents a significant cost saving that increases the attractiveness of the country by providing access to quality services with a lower investment amount. This means that a greater volume of projects and contracts can be carried out, thus, the market is energized and there is a greater movement of positions.

## BEHAVIOUR DOLLAR VS COLOMBIAN PESO

AVERAGE THE LAST 5 YEARS

“Being agile, making efficient decisions, having greater control and better time management and productivity, all of these are the greatest advantages of nearshoring, in addition to cost reduction when talking of foreign companies that come to our country to invest in foreign currency valued in the market, additionally a competitive technological industry demands better salary schemes as well as investments in innovative projects”

**CAROLINA CHAVES**

DIRECTOR PAGE CONSULTING COLOMBIA.

INSIGHTS

# STEM PROFESSIONALS POTENTIAL IN MEDELLIN

Our Talent is young, abundant, and qualified. According to the population distribution in the metropolitan area of Medellin, we found that 24% of our population is young (*Dane, 2022*) and we count with a workforce 2.1 million people corresponding to 65% of the population, thus indicating the human potential of the region binding together with investing companies settled in the region.

## POPULATION AGE IN MEDELLIN AM - 2021

AGE RANGE

Source: DANE, 2022

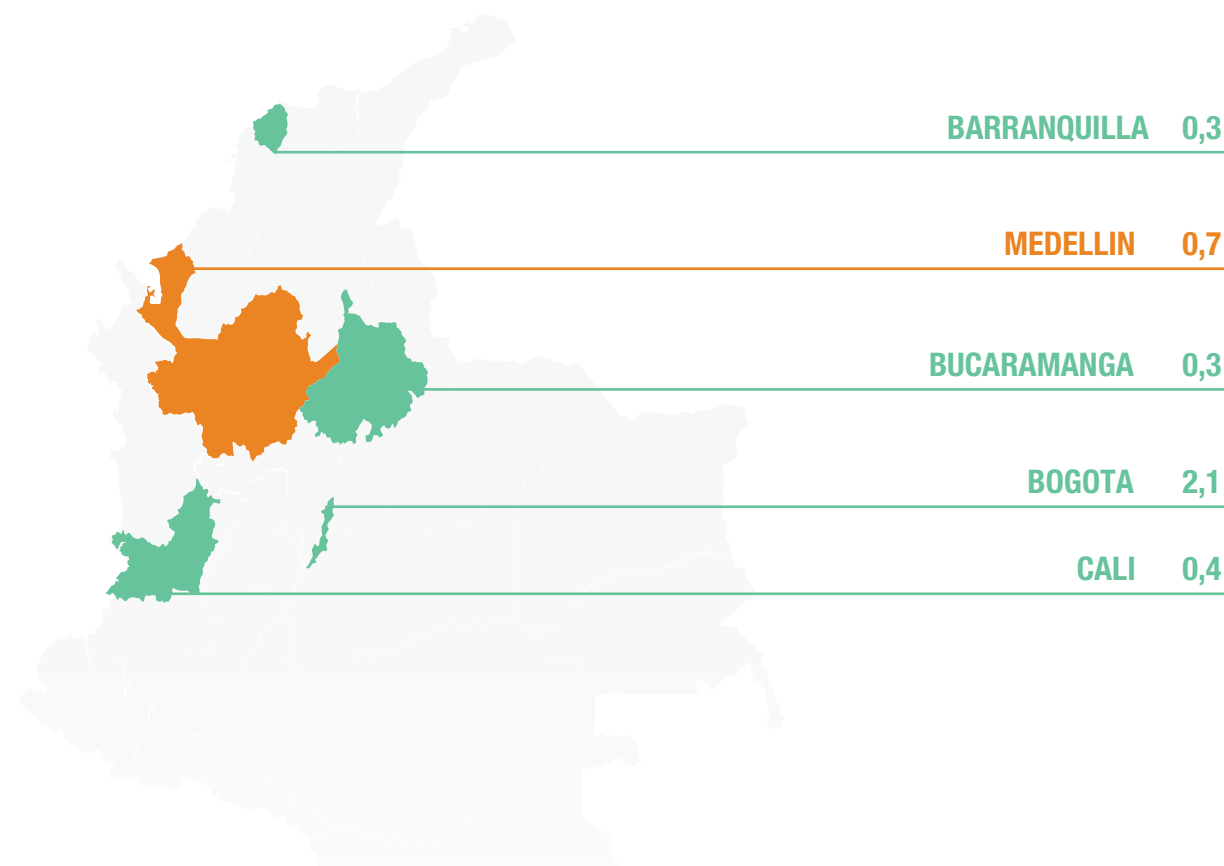

The role and capabilities of higher education institutions in our territory are first level and relevant in the national and international context. Medellin and its metropolitan area count with 50 higher education institutions, among them the following stand out: Universidad de Antioquia, Universidad Nacional, EAFIT & Universidad Pontificia Bolivariana - UPB which in 2021 were ranked among the 100 best universities in Latin America. *QS World University Ranking 2021*.

Antioquia is the second department with the greater number of graduates with higher education in Colombia. Between the years 2001 and 2020 the total number of graduates and postgraduates in Antioquia added to 745 thousand people, which represents 13% of the total number of graduates in the country.
