### Company's

## INFORMATION

TALENTO CONSULTORES SAS is a Software as a service company in occupational health and safety at work. We create Epidemiological Surveillance Systems in occupational health with predictive models that anticipate the risks of workers suffering from occupational diseases and connect them to the companies' Occupational Health and Safety Management System. We have the power to reduce the incidence and prevalence of occupational diseases by up to 76% because we can calculate the risk of their occurrence before the worker gets sick.

### Initial investment

**Capex USD 500.000**

\* TMR: 4.255

### Investment mechanism

**Equity / Mix**

### Quantifiable impact

**Reduce the incidence and prevalence of occupational diseases by up to 76% in rural areas**

### Investment

## PROPOSAL

Develop virtual epidemiological, musculoskeletal, cardiovascular, and psychosocial surveillance systems aimed at workers in the agricultural sector in Colombia, as well as its expansion to the markets of Panama and Brazil.

The project seeks to offer a permanent health solution to those who are responsible for deciding on the execution of prevention and control actions, providing for this purpose, updated information on the occurrence of diseases, conditioning factors, and defined populations "of risk" in workers of the agricultural sector monitored for clients in Colombia, Panamá, and Brazil.
